NATIVE ADVERTISING

Native advertising is a type of advertising online, that matches the form and function of the platform upon which it appears.

In many cases, it manifests as an article produced by an advertiser with the specific intent to promote a product, while matching the form and style which would otherwise be seen in the work of the platform's editorial staff.

The word «native» refers to this coherence with the tone of the section in which it appears: News (company information) or What's New (product information), for more efficiency! Whether it's News or What's New, this Native Advertising will also be featured on a LinkedIn post (over 2.600 subscribers!)
